MONGODB ASSOCIATE DEVELOPER (PYTHON)

MongoDB | December 2025

SUMMARY

Detail-oriented technical support with experience providing troubleshooting and guidance in fast-paced environments. Skilled in Bash, Git, programming, and translating complex concepts into clear, actionable instructions. Proven ability to manage multiple requests, improve workflows, and help users confidently solve problems.

EXPERIENCE

COMPUTER SCIENCE LAB ASSISTANT

Seattle Pacific University | Seattle, WA | 2023-Present

- Demonstrated strong patience and adaptability by providing 9+ hours/week of technical support to students with varying levels of experience.
- Effectively managed multiple requests simultaneously (up to 5 students at once), prioritizing issues and maintaining an organized, calm workflow in a fast-paced lab environment.
- Translated complex technical concepts into clear, understandable explanations, ensuring students could understand and apply solutions independently.

COMPUTER SCIENCE TEACHER ASSISTANT

Seattle Pacific University | Seattle, WA | 2026

- Selected as a TA for strong academic performance, supporting instruction, and student success.
- Streamlined grading using Bash and Git workflows, improving efficiency and consistency across multiple classes.
- Provided clear, actionable feedback and maintained communication with students and professors that improved students' understanding and academic performance.

PREITS ALLEZ

Seattle Pacific University | Seattle, WA | 2025-Present

- Developed a fencing game in Unity as a team project.
- Designed system architecture and implemented core gameplay systems.
- Built procedural animation using inverse kinematics (IK) with IKPF for foot placement.
- Engineered player physics, input handling, and lighting to enhance responsiveness and realism.
